Bulletin No.: MSA-4

Date: 7/27/92

**SUBJECT:** Consolidated Fuel Systems Service Bulletin CF 1-92, Revision 1, dated 7/06/92 and Airworthiness Directive 92-15-16.

## SECTION I - PLANNING INFORMATION

### A. EFFECTIVITY:

All MA-3, MA-3A, MA-3PA, MA-3SPA and MA-4SPA carburetors which have been repaired or overhauled using a Consolidated Fuel Systems (CFS) float, P/N CF30-766, with a "10 91" date stamped on the float arm.

**PLEASE NOTE:** If documentation or other proof is available which shows that a Precision Airmotive float was installed in a carburetor, disassembly of the carburetor for float inspection should not be necessary.  
(See SECTION II - ACCOMPLISHMENT INSTRUCTIONS)

### B. REASON:

This Service Bulletin is being issued to provide additional information about the subject Service Bulletin and Airworthiness Directive and to reiterate Precision Airmotive's position with respect to the use of "unauthorized parts" in Precision Airmotive fuel controls. Consolidated Fuel Systems Service Bulletin CF 1-92 is reprinted herewith in its entirety.

### C. COMPLIANCE:

**Compliance is required before further flight.** Airworthiness Directive 92-15-16 requires removal of all Consolidated Fuel Systems floats with a date code of 10 91.

## SECTION II - ACCOMPLISHMENT INSTRUCTIONS

- A. Disassemble the carburetor and visually inspect the float for Consolidated Fuel Systems part number CF30-766. Remove the float if the date "10 91" is stamped on the float lever arm, and replace it with a serviceable float. Consult Precision Airmotive (Facet) Service Manual #FSM or

Carburetor Float Kit Installation Instructions, 666-915, for float installation instructions.

- B. Floats identified with Precision Airmotive part number 30-766 with any date stamped on the float lever arm do not need to be removed or replaced.

NOTE: The "CF" prefix on the part number indicates that the part is manufactured by Consolidated Fuel Systems. Precision Airmotive and it's predecessors parts, have no prefix.

- C. If you can prove to the FAA through documentation or other means, that a Precision Airmotive float was installed in the carburetor, disassembly of the carburetor should not be necessary. Request an alternate method of compliance based on service records or other proof through an appropriate FAA Principal Maintenance Inspector.

Please note that all carburetors repaired, overhauled, rebuilt or newly manufactured by Precision Airmotive have Precision Airmotive floats in them. If these carburetors have not been disassembled and had the float replaced since original purchase, disassembly of the carburetor to visually inspect the float should not be necessary. Once again, the operator should submit a request for an alternate method of compliance based on service records through an appropriate FAA Maintenance Inspector.

If you have any questions regarding this service bulletin, please contact Precision Airmotive at (206) 353-8181.

#### WARRANTY INFORMATION:

Because Consolidated Fuel Systems manufactures parts to engineering and quality control specifications that are not the same as and are not approved by Precision Airmotive, these parts are "unauthorized" and Precision Airmotive does not approve of their use in Precision Airmotive (Facet/Marvel Schebler) fuel controls.

THE USE OF "UNAUTHORIZED PARTS" IN PRECISION AIRMOTIVE (FACET/MARVEL SCHEBLER) FUEL CONTROLS CONSTITUTES ALTERING OR MODIFYING THE FUEL CONTROL THUS VOIDING ALL WARRANTIES. PRECISION AIRMOTIVE IS NOT RESPONSIBLE FOR DAMAGE OR HARM TO THE AIRCRAFT OR IT'S OCCUPANTS FROM SUCH ALTERED OR MODIFIED FUEL CONTROLS.
