SUBJECT: AVAILABILITY OF REPAIR PARTS FOR FACET AEROSPACE/MARVEL SCHEBLER CARBURETORS

REFERENCE: Facet Service Information Letter, Serial No. 8-21-86

PURPOSE: Effective January 1, 1991, some of the repair parts which were previously made available only in kits, per reference Service Information Letter, will be available for purchase on an individual part basis. This should provide repair facilities greater flexibility in acquiring those parts which are required for a particular repair.

The 286-XXX Major Repair Kits and the 778-XXX Minor Repair Kits will still be available and their use is highly recommended whenever a carburetor is serviced. These kits comprise the minimum replacement parts required for overhaul or anytime a carburetor is opened for service.
