---

**SUBJECT: New Float for HA-6 Carburetors**

**PURPOSE:** To provide information.

- A) **EFFECTIVITY:** This Service Information Letter is applicable to all model HA-6 carburetors.
- B) **COMPLIANCE:** Information Only.
- C) **DESCRIPTION:** A new float has been developed for the model HA-6 carburetors. Float part number 30-860 will replace the 30-800 float. When replacing a float in one of the affected carburetors, use the 30-860 float in combination with a 29-182 float valve clip. These parts are available individually or as a part of float kit 666-1001. Install in accordance with Instruction Sheet E-1001.
- D) **PUBLICATIONS AFFECTED:** All applicable illustrated parts list pages in carburetor manual # FSM should be marked to reflect the changes:
  - 1) Replace part number 30-800 with part number 30-860
  - 2) Add part number 29-182
- E) **ADDITIONAL INFORMATION:** The new floats are a solid foam material, with a smooth skin. In some cases, there will be small imperfections in the skin of the floats (such as small voids or a rough surface). These imperfections are cosmetic only and do not affect the performance of the float.
- F) **ATTACHMENT:** The E-1001 Instruction Sheet is attached to this service information letter and should be kept with the applicable overhaul manual for reference.
